

What Makes Us Different

Quality Processes & Products - The longevity of a commercial pool is directly related to its quality - from the excavation process, to the steel reinforcement, to the pool formation methodology (concrete, shotcrete or gunitite), to the equipment selection, water recirculation and water filtration. Throughout our 30 years building pools we have always recommended the highest quality your budget can support. Your pool is the most important component of your facility's success...give it a distinguished difference of quality.

Technologically Advanced Products provide benefits not available to older pool design methodologies - As a leading commercial pool builder, we are able to offer the latest innovations that enable unsurpassed water cleanliness and pool longevity. Trust your state-of-the-art aquatic facility to a commercial pool contractor and know that your pool is built to last a lifetime.* (*Well built pools that are well maintained can have a life span of up to 50 years).

Attention to Detail - As a facility manager, you'll appreciate the attention to detail we provide when installing the pipes and equipment to keep your pool well maintained. Where possible we recommend schedule 80 PVC, brass fittings and true union valves.

Your Partner Throughout the Process - Building a commercial aquatic facility can sometimes be challenging. We're here to help. From the beginning of the process where you might need budget formation, value engineering or consultant aid selection to the end of the process where you need instruction on how to best maintain your pool, our experience and network we can guide you every step of the way.

Municipalities, Parks & Recs, YMCAs and other leading organizations. Our knowledgeable and experienced team is dedicated to bringing you the best quality, service and integrity to make your aquatic facility a success. Experience the KC Gunite difference, trust your aquatics construction to KC Gunite.
